

2026 CLIVIA KINGDOM Miniata Seed List.

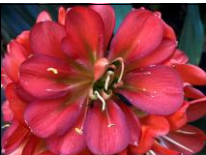

Please take note that all our flowers are open pollinated and while considerable care is taken during pollination, we cannot guarantee the expected or desired outcome. There are three seeds in every packet.

COTY SERIES An exciting range of versicolours, bitonal versicolours and almost white flowers. The plants are small, compact and have reasonably broad leaves. They are fully compatible with Love Child, B4M and several other versicolours. COTY characteristics appear to be dominant when used as a pollen parent in seedlings that have flowered with us so far. Sadly very few COTY seeds are produced from year to year.
